

AMPT TO EXHIBIT AT SONEX 2016 IN AMMAN, JORDAN – MAY 16-19, 2016

[Ampt LLC](#), a leader in power conversion technology for solar power plant optimization, will be exhibiting at the [Solar Near East Exhibition and Forum](#) at the Halls of Amman International Exhibitions Center, in Amman, Jordan from May 16-19, 2016.

SONEX 2016 combines business with investment for an audience of professionals and trade visitors. The exhibition will cover various sectors of the solar technology industry, including photovoltaic (PV) modules, solar thermal systems, solar boilers and pumps, solar water heating systems, smart grid and smart metering, environment technology, green energy, solar inverters and control, solar batteries and chargers, renewable energy and energy saving.

Ampt will be showcasing its DC String Optimizer at the exhibition. Ampt's optimizers lower the cost and improve the performance of large-scale PV systems, featuring patented technology that enable these systems to deliver more value than traditional system designs without Ampt. The company will display its DC String Optimizers at booth #B66, alongside [Be Solar](#).

About Ampt

Ampt delivers innovative power conversion technology and communications capabilities that improve the way PV systems are designed. The company, along with strategic partners in the HDPV Alliance, is lowering system cost, improving ROI, increasing energy generation and broadening the PV solar market.
